## PROJECTS

### PROMPTOPIA Link

**Tech Stack:** React, Next.js,  
JavaScript, HTML5, CSS3, Next  
Auth, MongoDB.

- Users can create, edit, and share AI prompts with the community, categorized by different topics.
- It features a modern design, user profiles, prompt editing/deleting, and search functionality by tags
- The platform is fully responsive, providing an optimal experience across devices, from desktop to mobile.

## EXPERIENCE

### PIXZEST TECHNOLOGIES PVT LTD | SOFTWARE ENGINEER

February 2024 - Sept 2024 | Bangalore

### SEO OPTIMIZED WEBSITE | FRONTEND DEVELOPER

**Tech Stack:** React, Gatsby, JavaScript, HTML5, CSS3, Contentful, Netlify.

- Created an **SEO** optimized website, streamlining content updates and management through Contentful.
- Implemented meta tags and SEO best practices, resulting in a **100%** SEO score and improved search rankings.
- Integrated lazy loading with the Gatsby plugin, improving site loading speed by **10%**.

### ADMIN PORTAL DEVELOPMENT | FRONTEND DEVELOPER

**Tech Stack:** React, JavaScript, HTML5, CSS3, Firebase

- Developed an admin portal from scratch using React, enabling efficient **CRUD** operations.
- Implemented Firebase for user authentication, securing the platform and improving user access control.
- Created state management using **Context**, sharing login details across pages and restricting access to logged-in users.
- Improved content management efficiency by **30%**, increasing user satisfaction and usage.

### LOCALIZATION FOR CLIENT WEBSITE | FRONTEND DEVELOPER

**Tech Stack:** React, Gatsby, JavaScript, Contentful, Netlify

- Built a localized website using Gatsby, supporting content in multiple languages and regions.
- Integrated Contentful for easy management of localized content, improving content consistency across regions.
- Increased international user engagement by **25%**, ensuring the site met internationalization needs.

### AUTHENTICATION-BASED WEBSITE | FRONTEND DEVELOPER

**Tech Stack:** React, Gatsby, JavaScript, Firebase, Tailwind CSS, Contentful, Netlify

- Created a user-authentication-based website with dynamic content tailored to logged-in users.
- Implemented Firebase authentication, ensuring secure login and user session management.
- Designed a fully responsive and accessible interface using Tailwind CSS, improving user experience.

### EMAIL SENDING SERVICE | BACKEND DEVELOPER

**Tech Stack:** Node.js, Express.js, Nodemailer, AWS

- Developed a scalable email sending service using Node.js and Express.js, improving the email delivery process.
- Collaborated with DevOps to deploy the project on AWS, ensuring reliability and scalability of the service.
- Increased email delivery efficiency by **20%**, ensuring timely and accurate email distribution.
